44 With the completion of years of Gujarat State Forest Development Corporation's service to the tribals of our state, we have expanded our workings to various other sectors and establishments with our roots intact.

Vision

Our vision is to achieve the overall development of the scheduled tribe and other traditional forest dwellers through sustainable usage of the surrounding natural resources.

Mission

Our mission is to serve society through industry along with commitments, ethics, excellence and learning in all our acts and relationships with customers, associates and the community at large.

- ▶ To strive for the attainment of economic security of the forest dweller communities.
- ▶ To eliminate commercial exploitation of forest dwellers who collect MFP as a means of livelihood.
- ▶ To maximise and accrue financial benefits to the principal user community in the forests.

Objectives

To undertake commercially viable and ecologically sustainable forest-based enterprises.

To eliminate exploitation from private trade of forest dwellers in general and the tribal community in particular, who derive sustenance through a collection of Minor and other Forest Produce.

To maximise benefit percolation from such trade to the tribal.

About Us

Gujarat State Forest Development Corporation Limited (GSFDC) was established in August 1976 and registered under the Companies Act 1956.

The National Agriculture Commission (NAC) recommended the establishment of Forest Development Corporations in each State to accelerate the progress and development of the forestry sector. In 1979 the Minor Forest Produce (MFP) trade was nationalized in Gujarat. The Corporation was entrusted with the task of its execution. This meant translating on the ground the State Policy of protecting the economic interest of STs, SCs and other weaker sections while justifying its Corporate status. This Corporation gets no grants and budgetary support from the Government.

Our Technology Profile

Wood is a truly amazing material. Closely associated with mankind for ages, it has been used by mankind to utilize its versatility for centuries to satisfy its needs. Despite many technological advancements and the advent of synthetic substitutes, wood remains to be a favourite capable to create diverse applications.

The emphasis in the timber industry is now on the utilization of plantation timber so as to conserve natural forests. Prudent wood sourcing, proper chemical treatment, seasoning and joinery are essential to this. To serve this end, we at Gujarat State Forest Development Corporation have established an Integrated Wood Working Unit, VANIL UDYOG, at the Navtad village in Vansda Taluka of the Navsari District where about 250 artisans work under the supervision of qualified and experienced engineers to produce quality products generated from the timber. The Vanil Udyog has received the prestigious ISO 9001:2000 certificate for its Quality Management System from the RWTUV, Germany.

With the latest band sawmills, a conventional and a solar-seasoning plant, a chemical treatment plant along with a door window and furniture joinery unit, the Vanil Udyog makes sure to provide the best of nature through its products. Due to the use of high-grade anti-termite chemicals and pressure impregnation type preservative treatment along with other seasoning processes, the products manufactured by Vanil Udyog are secured against termite attack and are free from effects like warping etc.

The regular upgradation of technology and processes, training of human resources and use of premium quality teak and non-teak wood and stringent quality control have made the Vanil products stand as synonymous with high quality. Displaying the highest standard of professionalism, transparency, fairness and business ethics in all our dealings with customers and suppliers and aiming at total customer satisfaction, and timely delivery of products is what we at Vanil Udyog strive for.

Our Manufacturing Process

A proud manufacturer of different kinds of furniture pieces from various kinds of wood species like Valsad teak wood and superior secondary non-teak wood, Vanil Udyog has state-of-the-art modern sawmills, conventional and solar seasoning plants, wood processing plants, furniture joinery units, wood art and finishing sections wherein about 148 Tribal workers are at present engaged under supervision of qualified and experienced engineers.

We produce quality products as per the guidelines of Indian Standard Specifications. With greater emphasis laid on the conservation of precious wooden species like teak, we aim to promote the usage of treated non-teak wood timber by making it more or less comparable to its original species. Non-teak wood is upgraded to the level of teak wood and yet reduces the cost by about 40% through chemical treatment and seasoning processes.

The manufacturing process of all kinds of our furniture pieces is performed as below.

- Round timber procured from the Forest Department is stacked in our Timber Yard Section.
- The same is then sent to the Sawmill for sawing purposes as per the set requirements.
- Sawn timber (converted into requisite sizes) is then transferred to the chemical treatment and seasoning plant for the seasoning process.
- After treatment and seasoning of the pieces, the wood is sent to the woodworking section for further planning and other required operations/processes where the sawn sizes are converted into semi-finished products.
- Such-furnished sizes are transferred to the furniture and assembly section for manufacturing the end/finished products.
- Finished products are at the last stage and transferred to the storage room/godown/dispatch section where the entire range of finished products are stored for dispatch purposes.

Our Quality Policy

Vanil Udyog is an ultra-modern fully integrated woodworking unit equipped with hi-tech state-of-the-art wood processing and manufacturing facilities. These include a saw-mill, conventional and solar seasoning plant, pressure impregnation type wood preservation plant, latest machining, joinery and assembly units.

We at Vanil Udyog constantly strive to excel in our quality through careful and utmost supervision, efficient utilization and sustained innovation. Since joinery operations are the backbone of all wood products and play an important role in deciding their durability, we employ a team of qualified and experienced engineers to achieve perfection in it.

Features of Vanil Products

- Elegant Designs
- Greater Strength and Durability
- Genuineness of Wood
- Termite Resistant
- Better Finish and High Workmanship
- FirmScrew and Nail Holding Capacity
- Weather Resistant
- Fungal Resistant

Our Product Range

We help you explore furniture by segment or room or material for a highly customised space that adapts to your personal taste.

Home / Office / School

SofaSets

Crafted with passion, high quality and style, where you find true support.

More than just a couch...

A perfect blend of functionality and exceptional aesthetics.

Sleek. Trendy. Functional.
Uncompromised Quality.

Amalgamation of heritage
and modernity redefined.

Tepoys

Amplifying the look of your room,
with the right blend of style and value.

Classic designs merged
with contemporary styles.

The Rectangular Story
Evoking a sense of nostalgia.

The Tale of Curves
Nailing the aesthetics.

The Right-angle Inspiration
Striking yet sophisticated.

Chairs

Making statements with timeless designs.

Where you switch to comfort.

Made for you to relax amidst nature.

Designed to meet your high-end needs.

Carving the old-world charms.

Dining Table

Showstoppers of your home.

Representing the ideals of minimalism and passion.

Shaped oval for comfort.

Easy on space.

Designed ergonomically.

Frames/ Shutter Doors

Style and endurance handcrafted
into one.

Representing the ideals
of minimalism and passion.

Blending modernity
with strength.

Stools

Inspired by exclusive finishes and sturdy designs.

Finest quality inspired by the spirit of freedom and adventure.

Traditional way to accent your functionality.

Temples

Open your home to the decor of divinity.

Traditionally crafted double.

Showcasing the beauty of single door.

Flowerpot Stands

The perfect compliment to everything contemporary.

Uplifting the ambience of your space.

Amplifying the earthen feel.

Best of craftsmanship.

Patla

Designed for modern Indian homes.

Uplifting the ambience
of your space.

Office Tables

Preparing you for inspiration.

Designed for compact
spaces in contemporary styles.

Office Partitions

For where dimensions take shape.

Perfectly organising spaces.

Medium Height Cabinets

Intersections form and function.

Ample space to keep things organised.

Smartly crafted for greater storage.

Office Computer Table

Dumme text taineovation. Since
joinery operations are the backbone

Designed with minimalism
with high-end durability.

Low Height Cabinet

Multi-functional and unique
configurations.

Clean wooden finishes that
enhance the look of a space.

Symmetrical fun to create
the perfect balance.

Side Unit Cum Locker

Ever-evolving workspace with
problem-solving designs.

Multiple drawers to
help keep things organised.

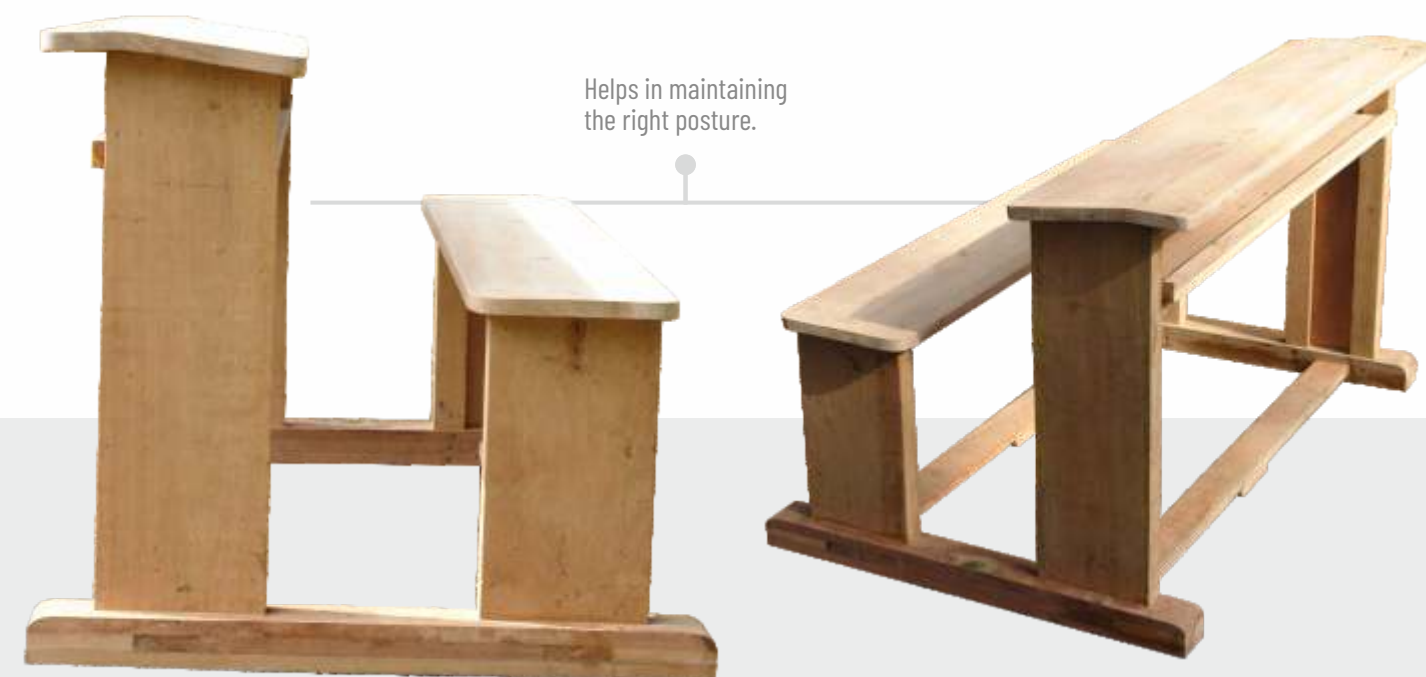

School Bench

Enriching comfort for better learning.

Chiselled to
perfection

Helps in maintaining
the right posture.

Easy functionality in
contemporary ways.

Laboratory Table

Evolving. Practical. Fuss-free.

Designed for expert professionals.

Staircase Railing

Where linework meets woodwork.

Intricate work to amplify areas.

Merging endurance and traditional styles.

Library Cupboard

Solutions for extraordinary spaces.

Who Helped Us Grow?

The Gujarat Forest Development Corporation puts great efforts towards the optimum utilization and sustainable development of the minor forest produce (MFP) for providing and encouraging livelihood opportunities to the forest dwellers who reside in and around the forest areas of the Gujarat State and preventing their exploitation from the middlemen.

Along with being engaged in other activities like raising eucalyptus commercial plantations, production and marketing of teak & non-teak furniture, renovation of offices and manufacturing and marketing of furniture pieces, our forest dwellers helped us reach where we are today.

Our Prestigious Customers

We aim to serve society through industry and our prestigious customers help us achieve our goals.
